## DETAILED ACTION

1. Claims 1-27 are presented for examination. The information provided in the response filed 04/08/04 at the request of the Examiner is greatly appreciated. However, given the complexity and volume of documentation, further detail is requested.

Applicant's input on whether any documentation submitted in the IDS filed 04/08/04 constitutes prior art is requested in response to the office action. Applicant is most familiar with the IDS documentation and in the best position to discuss the relevance of the art with respect to the claims.

Applicant should note the modifications to section 2 below and a response is once again greatly appreciated.

2. The examiner requests, in response to this Office action, any reference(s) known to qualify as prior art under 35 U.S.C. sections 102 or 103 with respect to the instant claims. That is, any prior art similar to the instant claimed invention that could reasonably be used in a 102/103 rejection. This request does not require applicant to perform a search. This request is not intended to interfere with or go beyond that required under 37 C.F.R. 1.56 or 1.105. This request may be fulfilled simply by asking the attorney(s) of record handling prosecution and the inventor(s)/assignee for references qualifying as prior art. A simple statement that the query has been made and no prior art found is sufficient to fulfill the request. Otherwise, the fee and certification requirements of 37

CFR section 1.97 are waived for those documents submitted in reply to this request.

This waiver extends only to those documents within the scope of this request under 37 CFR, section 1.105 that are included in the application's first complete communication responding to this requirement. Any supplemental replies subsequent to the first communication responding to this request and any information disclosures beyond the scope of this request under 37 CFR section 1.105 are subject to the fee and certification requirements of 37 CFR section 1.97. In the event prior art documentation is submitted a discussion of relevant passages, figs. etc. is requested. **A response to this inquiry is greatly appreciated.**

The examiner also requests, in response to this Office action, support be shown for language added to the claims on amendment. That is, indicate support for newly added claim language by specifically pointing to page(s) and line no(s). in the specification and/or drawing figure(s). This will assist the examiner in prosecuting the application.

3. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.

In the Remarks filed 04/08/04, applicant states "Products that have incorporated the claimed subject matter: Connected Components Corporation Compiler ("CCC Compiler") produced by Connected Components Corporation of Boston, MA, now

Art Unit: 2188

owned by Intel Corporation of Santa Clara, CA.” However, a particular document in the IDS with the title “CCC Compiler” or “Connected Components Corporation Compiler” could not be found. If the CCC Compiler is discussed in a particular document(s) within the IDS please specify which document(s). If a discussion of the product is not in the IDS, please provide any relevant documentation. Does the product include the exact claimed subject matter? That is, would the product itself constitute an on sale bar if sold or offered for sale more than one year prior to the date of application? Provide the date the product incorporating the claimed subject matter was sold or offered for sale.

4. Claims 1-27 are allowable over the prior art of record.
